Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/829,845, filed on April 10, 2001.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 35-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 recites the limitation "the endoscope" in line 7. There is insufficient antecedent basis for this limitation in the claim. It is also noted the phrase "a television camera....built therein" recited at lines 3-4 also renders the claim indefinite because it is unclear for where the television camera to be built in. Is it built in the "optical system" or "observation device" or the "image pickup apparatus" as a whole? Thus, structural and operational relationships between the camera and other elements are needed since such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Newly added claims 35-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,612,981. Although the conflicting claims are not identical, they are not patentably distinct from each other because the recitation of "a television camera having an image pickup element" in the instant application is clearly similar or obviously the same as the "image pickup device" claimed in the patent claims and since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 3742

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See MPEP § 804.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Matos (US 2003/0233129 A1) discloses a system for monitoring external defibrillation and pacing which allows an untrained human enabler immediate access to a medical professional at a central station with remotely monitoring, diagnosing, and treating a victim of medical emergency at one of a plurality of remote sites.
